

AMINE TRABELSSI

Cybersecurity Engineer · SOC Analyst · AI Security Developer

aminetrabelssi14@gmail.com · +21621293653 · linkedin.com/in/amine-trabelssi · Tunis, Tunisia

PROFILE

Cybersecurity engineering student with hands-on experience in SOC operations, autonomous incident response, and full-stack secure development. Built AI-driven security agents, deployed multi-site SIEM/SOAR pipelines, and developed ML-based intrusion detection systems. Comfortable operating in both offensive and defensive environments. Seeking to contribute to a security team tackling real-world threats.

EDUCATION

Cybersecurity Engineering—Information Systems & Network Security	2023 – Present
TEK-UP University of Digital Sciences, Tunis	
– Specialization: SOC, Threat Detection, Incident Response, Network Security	
– Focus areas: SIEM/SOAR, AI-powered security, offensive & defensive security	
Degree in Computer Systems Engineering	March 2024
Higher Institute of Information and Communication Technologies (HICT), Tunis	
– Coursework: AI, Deep Learning, Data Mining, Full-Stack Development, Network Administration	
Honors Bachelor of Computer Science	June 2021
Mourouj 4 School, Tunis	

CERTIFICATIONS

Google Cybersecurity Professional Certificate	March 2026
Google / Coursera · Credential ID: 06U04D00RFHU	
– 8-course program covering SOC operations, Linux, Python automation, threat detection, SIEM, and network security	
IBM Cybersecurity Fundamentals	February 2026
IBM · Credential ID: PLAN-4FB8400F05FC	
PCAP: Python Programming—Input, Output & String Handling	December 2025
Logical Operations · Credential ID: 32ME1BXR0B0L	

EXPERIENCE

Full Stack & AI Security Developer — Intern	January 2024
Innovant Studio, Tunis	
– Developed an AI-powered accessibility platform for visually impaired users using SeamlessM4T (NLP/audio)	
– Secured user data flows: JWT authentication, RBAC, input validation, encrypted communications	
– Stack: Python, Node.js, React, MongoDB	
Full Stack Developer — Intern	March 2023
Contuba, Tunis	
– Built web applications in Symfony/PHP with secure payment transaction handling	
– Implemented OWASP Top 10 protections, backend hardening, and robust API architecture	

CYBERSECURITY PROJECTS

SENTINEL + RAPTOR — Autonomous SOC AI Agent	2025
– Designed and built a fully autonomous SOC agent using Claude AI and Groq LLaMA for end-to-end incident handling	
– Automated response chain: CVE/malware scanning → threat intel enrichment → firewall blocking → EDR isolation → AD revocation	
– MITRE ATT&CK; integration, SOAR automation, real-time Telegram alerting	
Stack: Node.js · Claude AI · Groq LLaMA · MITRE ATT&CK · SOAR	
Intelligent SOC Architecture — Multi-Site Secure Infrastructure	2026
TEK-UP University · Team: Amine Trabelssi, Ghassen Tekaya, Mariem Zainine	
– Deployed redundant MPLS backbone across multiple sites with OPNsense firewall (WAN/LAN/DMZ segmentation)	

- Full SOC pipeline: Wazuh → TheHive → Cortex → MISP → n8n (SOAR) with ZeroTier VPN overlay

– Developed custom Python IDS (Flask + Scapy + Scikit-learn) with ML-based threat classification

– Automated response: Telegram/email alerts, automatic IP blocking; tested against Nmap, ICMP Flood, brute force

2026
- Stack:Wazuh · TheHive · Cortex · MISP · n8n · OPNsense · ZeroTier · Python · Scikit-learn · OpenAI/OpenRouter

Banking SOC — Threat Hunting & SIEM Lab

- Built a 20-VM SOC lab with full SIEM, SOAR, and Threat Intelligence stack

– Deployed Wazuh (UEBA), MISP, TheHive+Shuffle, Suricata+Zeek; simulated ransomware, SQLi, brute force

– Compliance mapping: PCI-DSS, ISO 27001, SWIFT CSP

2024
- Stack: Wazuh · MISP · TheHive · Shuffle · Suricata · Zeek

PromptShield — AI Security Platform

- Real-time prompt injection detection with multi-layer engine: Rules + NLP + Context analysis

– Risk scoring (0–100) with live SOC dashboard and WebSocket streaming logs

2026
- Stack: FastAPI · Python · WebSockets · OpenAI

ChainTrust — Blockchain Credential Verification

- Tamper-proof credential verification platform on blockchain; streamlined validation of academic and professional certificates

2025
- Keywords: Blockchain · Immutable Records · Authentication Transparency · Data Security

TECHNICAL SKILLS

Offensive Security	Nmap, Gobuster, Burp Suite, Metasploit — SQLi, XSS, LFI/RFI, Auth bypass, OWASP Top 10
Defensive / SOC	Wazuh, Suricata, Zeek, MISP, TheHive, Shuffle — MITRE ATT&CK;, threat hunting, log analysis
Programming	Python (automation, ML, scripting), Node.js, Bash, C, C++, PHP (Symfony), JavaScript
Web Security	JWT, RBAC, API security, HTTPS/TLS, input validation, secure backend (Node.js, PHP, Express)
AI / ML Security	Claude AI, Groq LLaMA, OpenAI, Scikit-learn, SeamlessM4T — AI-driven SOC automation
Tools & DevOps	Linux (Kali, Ubuntu), Docker, Git, MongoDB, MySQL, TCP/IP, DNS, HTTP/S

LANGUAGES & SOFT SKILLS

Arabic: Native · English: Advanced · French: Advanced · Italian: Beginner

Analytical thinking (SOC mindset) · Problem solving · Adaptability & teamwork
